Questions to ask every company

1. What exactly is included: interior drainage, exterior membrane, sump pump with battery backup, crack repair, discharge lines and restoration?

2. How is the job priced: by job, by linear foot, or a flat scope price, and what would change the price?

3. Who does the work, your own crew or subcontractors, and what permits or county requirements apply to this job?

4. Is this an interior system, an exterior system, or both, and what warranty and documentation will I receive when the job is done?

5. What does the written quote cover, and what would change it once work starts, such as conditions found during excavation?

6. Where does the discharge water go, and what maintenance does the system need afterward?
